**What is Australian Standards Online?**
The database is a collection of full text Australian, IEC and International standards which may be viewed, downloaded, emailed or printed out in hard copy.

**Searching Australian Standards Online**
The default basic screen is a Quick Search for Australian Standards but other options can be selected from the menu on the left. You can also limit your search results by selecting one of the “search by” icons. Scrolling your mouse across the icons will display the source of the information, e.g., Concrete Institute of Australia or Forest & Wood Products.

Type your search term into the search box. A full list of matching standards will display.

Legislation and WHS law guide are **not** included in our subscription.

Remember to log out when you finish your search.
